

Coding & Solution

Date	29 September 2026
Team ID	UNM1659GenieBirds
Project Name	EduGenie – AI-Powered Learning Assistant
Maximum Marks	5 Marks

Coding & Solution

This section evaluates the quality and completeness of the implemented EduGenie solution. The application provides AI-assisted learning features including question answering, topic explanation, quiz generation, summarization, and recommended learning paths.

Instructions:

1. Ensure the code is well-structured, commented, and follows best practices for the selected technology stack.
2. The solution addresses the core learning problem and implements the key functional requirements.
3. Include the source files, configuration files, and setup instructions required to run the application.
4. Attach or link to the code repository (for example, GitHub) in the table below.

Solution Summary

Field	Details
Repository Link / URL	To be added by the team
Programming Language(s)	HTML, CSS, JavaScript
Framework(s) Used	Web-based frontend with AI/API integration
Key Features Implemented	Ask a Question; Explain a Topic; Generate Quiz; Summary Generator; Recommended Learning Path.
Pending / Incomplete Features	No major feature pending in the demonstrated prototype. Final deployment and repository documentation may be added.
Setup / Run Instructions	Open the project in a browser or run the configured web application. Ensure the required AI/API configuration is available before using AI-powered features.

Code Quality Checklist

S.No	Criteria	Status (Yes / No)
1	Code is modular and organized into functions / components	Yes
2	Meaningful variable and function names are used	Yes
3	Code includes comments / documentation where necessary	Yes
4	Error handling is implemented for critical operations	Yes
5	The application runs without critical errors	Yes
6	Code is committed to a version control repository	To be updated

Additional Notes / Comments:
