

No. of Functional Features Included in the Solution

|               |                                          |
|---------------|------------------------------------------|
| Date          | 29 September 2026                        |
| Team ID       | UNM1659GenieBirds                        |
| Project Name  | EduGenie – AI-Powered Learning Assistant |
| Maximum Marks | 5 Marks                                  |

Functional Features Overview:

This document lists the functional features included in the EduGenie solution. Each feature is described by its purpose, implementation status, and contribution to the overall learning experience.

| S.No | Feature Name              | Feature Description                                                                                  | Module / Component       | Status (Done / In Progress / Pending) | Marks Contribution |
|------|---------------------------|------------------------------------------------------------------------------------------------------|--------------------------|---------------------------------------|--------------------|
| 1    | Ask a Question            | Allows students to enter questions and receive AI-generated answers in an easy-to-understand format. | Question Module          | Done                                  | 1                  |
| 2    | Explain a Topic           | Provides a structured, student-friendly explanation of a selected learning topic.                    | Topic Explanation Module | Done                                  | 1                  |
| 3    | Generate Quiz             | Creates quiz questions from a selected topic so students can practise and check their understanding. | Quiz Module              | Done                                  | 1                  |
| 4    | Summary                   | Converts provided learning content into a concise summary containing important points for revision.  | Summary Module           | Done                                  | 1                  |
| 5    | Recommended Learning Path | Suggests an organized sequence of learning topics to help students study systematically.             | Learning Path Module     | Done                                  | 1                  |
| 6    | —                         | —                                                                                                    | —                        | —                                     | —                  |
| 7    | —                         | —                                                                                                    | —                        | —                                     | —                  |
| 8    | —                         | —                                                                                                    | —                        | —                                     | —                  |

Feature Summary:

| Metric                     | Count / Value |
|----------------------------|---------------|
| Total Features Planned     | 5             |
| Total Features Implemented | 5             |

|                                    |                                                                                                                         |
|------------------------------------|-------------------------------------------------------------------------------------------------------------------------|
| Core / Must-Have Features          | <div>A SmartBridge Product</div> 5 – Ask a Question, Explain a Topic, Generate Quiz, Summary, Recommended Learning Path |
| Additional / Nice-to-Have Features | None specified in the current prototype                                                                                 |
| Features Tested & Verified         | 5 – Core features demonstrated in the project demo                                                                      |

### Feature Category Breakdown:

| S.No | Category                  | Features in Category                 | Example Features                                                                                 |
|------|---------------------------|--------------------------------------|--------------------------------------------------------------------------------------------------|
| 1    | User Interface (UI)       | 5                                    | Question input, topic input, quiz interface, summary interface, learning-path display            |
| 2    | Backend / Logic           | 5                                    | Question processing, topic explanation, quiz generation, summarization, learning-path generation |
| 3    | Database / Storage        | 0                                    | No database/storage feature is required for the demonstrated core workflow                       |
| 4    | API / Integration         | AI service integration               | AI-powered response generation for learning features                                             |
| 5    | Security / Authentication | Not part of current core feature set | Authentication/security features are not demonstrated in the current prototype                   |
