

Project Initialization and Planning Phase

Date	29 September 2026
Team ID	UNM1659GenieBirds
Project Name	EduGenie – AI-Powered Learning Assistant
Maximum Marks	3 Marks

Define Problem Statements (Customer Problem Statement Template):

The problem statement is defined from the learner's point of view. It focuses on the difficulty students face when they need quick explanations, practice questions, summaries, and a structured learning path in one place. The statement helps the team understand the user's need and define the purpose of EduGenie.

Example:

I am	I'm trying to	But	Because	Which makes me feel
A student who needs learning support	Understand and revise topics efficiently	Learning resources are scattered and explanations may be difficult to understand	I need simple explanations, practice, summaries, and guidance in one place	Confused and less confident about my learning progress

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A student who needs an easy and effective way to learn and revise academic topics.	Understand topics, clear doubts, practice with quizzes, summarize study material, and follow a structured learning path.	Learning resources can be scattered, explanations may be too complex, and students may not know what to study next.	Students need personalized, simple, and interactive learning support in one platform.	Confused, overwhelmed, and less confident about learning progress.

Project Direction: Based on this problem statement, the team plans to develop EduGenie as an AI-powered learning assistant with five core capabilities: question answering, topic explanation, quiz generation, summarization, and personalized learning-path recommendations.
