Project Name	EduGenie – AI-Powered Learning Assistant
Maximum Marks	4 Marks

Empathy Map

Create an empathy map to understand your customer/user from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem your project addresses. This helps the team build a customer-centric solution.

SAYS • “Can someone explain this topic in simple words?” • “My textbooks are too long and hard to understand.” • “I don’t know what I should study first.” • “I need a quick revision before my exam.”	THINKS • Am I studying the right topics in the right order? • Searching many websites wastes my time. • I wish I could quickly test what I have learned. • Will I be able to revise everything in time?
AARTHI (College Student)	
DOES • Searches for answers across websites and videos • Reads long study material and notes key points • Asks friends or teachers when stuck • Practises with random questions found online	FEELS • Confused by difficult concepts • Stressed and overwhelmed before exams • Frustrated by scattered resources • Motivated when a concept finally becomes clear
